Chapter 1

Overview

Topics:

- [Changed functionality \(1.0.11638, 2015-06-19\)](#)
- [All releases](#)

The scope of this document is to provide the release notes of Places API, with respect to a particular release version. It also includes the issues reported, open and solved within this release.

Changed functionality (1.0.11638, 2015-06-19)

Changes for HERE public customers

API Features

- Additional flag for places indicating whether the place is open or not if opening hours are available.

Ristorante Rafele is one of the places that have opening hour information. On a Monday at 13:30h Eastern Daylight Time it rightly returns `isOpen` as `false`:

```
{
  "name": "Ristorante Rafele",
  ...,
  "extended": {
    "openingHours": {
      "text": "Mon-Thu, Sun: 17:00 - 23:00<br/>Fri, Sat: 17:00 - 00:00",
      "label": "Opening hours",
      "isOpen": false,
      ...
    }
  },
  ...
}
```

Requesting the same resource at 21:30 Eastern Daylight Time on a Tuesday yields the following:

```
{
  "name": "Ristorante Rafele",
  ...,
  "extended": {
    "openingHours": {
      "text": "Mon-Thu, Sun: 17:00 - 23:00<br/>Fri, Sat: 17:00 - 00:00",
      "label": "Opening hours",
      "isOpen": true,
      ...
    }
  },
  ...
}
```

- Content from Lonely Planet is no longer served.

Changes for HERE public customers

API Features

- Additional flag for places indicating whether the place is open or not if opening hours are available.

[Ristorante Rafele](#) is one of the places that have opening hour information. On a Monday at 13:30h Eastern Daylight Time it rightly returns `isOpen` as `false` :

```
{
  "name": "Ristorante Rafele",
  ...,
  "extended": {
    "openingHours": {
      "text": "Mon-Thu, Sun: 17:00 - 23:00<br/>Fri, Sat: 17:00 - 00:00",
      "label": "Opening hours",
      "isOpen": false,
      ...
    }
  },
  ...
}
```

Requesting the same resource at 21:30 Eastern Daylight Time on a Tuesday yields the following:

```
{
  "name": "Ristorante Rafele",
  ...,
  "extended": {
    "openingHours": {
      "text": "Mon-Thu, Sun: 17:00 - 23:00<br/>Fri, Sat: 17:00 - 00:00",
      "label": "Opening hours",
      "isOpen": true,
      ...
    }
  },
  ...
}
```

```
}  
},  
...  
}
```

- Content from Lonely Planet is no longer served.

1.0.11607 (2015-06-17)

Changes for HERE public customers

API Features

- Introducing new Category System (`cs`) parameter.

This parameter lets the caller select an alternate category system (e.g. cuisines). This parameter is available in all Search and Discovery endpoints. [Read more](#)

1.0.11572 (2015-06-12)

Changes for HERE public customers

API Features

- Places API no longer supports following languages for labels and ready-to-display strings:
 - Amharic
 - Armenien
 - Assamese
 - Bengali (Bangladesh)
 - Chinese (Hong Kong)
 - Georgian
 - Gujarati
 - Igbo
 - Kannada
 - Khmer
 - Krygyz

- Lingala
- Malayam
- Marathi
- Mongolian
- Myanmar
- Oriya
- Pashto
- Punjabi
- Sesotho
- Sinhalese
- Swahili
- Tajik
- Tamil
- Telugu
- Turkmen
- Urdu
- Uzbek
- Xhosa
- Yoruba
- Zulu

You can see all supported languages [here](#)

- Added cuisines translation for our 55 supported languages.
- Introducing new Category System (`cs`) parameter.

This parameter lets the caller select an alternate category system (e.g. cuisines). This parameter is available in all Search and Discovery endpoints. [Read more](#)

- Here Entrypoint is now fully supported and mature.
- Around Entrypoint is now fully supported and mature.
- The error response of the corridor shortener now contains a more relevant documentation link in case the client sent the wrong Content-Type header.

1.0.11500 (2015-05-21)

Changes for HERE public customers

There are no notes for this release

1.0.11481 (2015-05-13)

Changes for HERE public customers

API Features

- Fixed a bug where derived search center is wrong, if viewport crosses -180 degree.

1.0.11462 (2015-05-10)

Changes for HERE public customers

API Features

- Fixed corridor visualization in playground.
- Tutorial in the playground now has examples for Key-by-Key feature.

Search Features v35

- *Key-by-Key Endpoint*

Key-by-Key is a new endpoint designed to reduce the number of keystrokes required to find the desired POI, Category, Chain, or Address. A key component to the endpoint is multiple partial term completion. For example, the query “mcd ber” will return results for McDonald’s in Berlin.

Search for intersection is also supported in key-by-key. For example, when searching for “chaussee invaliden”, the intersection between Chausseestraße and Invalidenstraße in Berlin will be returned.

The Key-by-Key endpoint is released with Limited Availability. Please contact your sales representative or the Search & Places product team for more information.

Content

- *HERE Core (Q4 2014)*
Includes Core POIs such as global Airports, Hospitals, Banks, Grocery Stores, etc.
- *HERE Base Supplemental Listings (Q4 2014)*
Includes POIs mapped to Core POI categories obtained from third party/local specialty sources
- *HERE Extended Listings Australia (Q4 2014)*
Comprehensive set of POIs for this geography:
 - HERE Maps 56 & 57
 - Maps 57 for U.S.
 - Maps 56 for rest of world
- *In addition, Version 35 provides a set of manually moderated POI corrections and enhancements*

1.0.11440 (2015-05-04)

Changes for HERE public customers

API Features

- Added support for many new cuisine categories. For the full list of supported cuisine types see the `categories/cuisines` endpoint, e.g. at https://places.demo.api.here.com/places/v1/categories/cuisines?at=52.521%2C13.3807&app_id=demo-qCG24t50dHOwrLQ&app_code=NYKC67ShPhQwqaydGIW4yg
- Fixed an issue that caused some places to be returned with zero-area bounding boxes in search responses, which would lead to a 400 error response when following the "href" URL to get the place details.
- The `tf` (text format) parameter is now propagated to the "next" and "previous" links returned by the API, as previously documented.

1.0.11365 (2015-04-17)

Changes for HERE public customers

API Features

- Structured opening hours are now returned in place details responses when available.
- Building parameter for `/discover/here` endpoint

The `/discover/here` endpoint now supports a `building` parameter which can be used with HERE 3D building Ids for indoor navigation, e.g. searches in big shops/malls. Building Ids are available for clients who use Enterprise SDKs or have access to map content by other means.

- Content types in playground have been fixed

Some files in the playground (css, js, images) were being served with the wrong content type. This is fixed now.

1.0.11324 (2015-04-13)

Changes for HERE public customers

There are no notes for this release

1.0.11300 (2015-04-08)

Changes for HERE public customers

Search Features v34

- *Chain Support Enhancement for Automotive Dealers*

Additional vehicle brands are added to Chain Search. End-users can now search for the brands and receive a set of relevant POIs ranked by distance. For a list of supported vehicle brands, see [appendix](#).

- *Facebook ID now in Search Response*

Facebook IDs now provided for matched POIs. Developers can use these IDs to retrieve and display Facebook content related to the location.

- *Chain Search Support Enhancement*

Chain Search is a sub-system that identifies a query term as a chain of stores and returns a result set of the stores ranked by distance from the search location. Stores beyond 200 km are not returned. When Chain Search is invoked, only stores belonging to the chain are returned. Other locations with similar names will not be returned. Chain Search uses an "intercept list to match query terms to store chains. In Search 34, the intercept list has been expanded. The additions to the intercept list are included in the [appendix](#) of this document.

- *Category Search Enhancement for UK English*

The Search endpoint provides better recognition for category-like UK English queries. Examples of such queries are included in this document's [appendix](#).

- *Category Search Enhancement for French*

The Search endpoint provides better recognition for category-like French queries. Examples of such queries are included in this document's [appendix](#).

- *New Support for "Nearby" Queries*

Search 34 adds support for "Nearby" queries in English, German, French, and Spanish. Example queries include "Restaurants near me" and "Nearby Starbucks". Nearby queries support both Categories (e.g.: restaurants, museums, bars) and Chains (e.g.: Lidl, Walmart).

- *Enhancements to Category Search: Shopping*

Search 34 provides more relevant results when searching for "Shopping". Less relevant sub-categories (e.g.: "major-appliance", "floor and carpet", "motorcycle-accessories") have been removed from the Shopping category.

- *Viewports No Longer Required*

Search 34 removes the requirement that a viewport be defined for category queries like "Restaurants" and "Shopping". All recognized category queries now trigger category ranking, no matter whether a viewport is specified.

- *Bug fix: Searching for Bali returns the city of Paris.*

- *Bug fix: Searched for "Spanish Food had no luck.*

- *Bug fix: Query for "winkel" (English translation = Shop) does not produce expected results.*

- *Bug fix: Searching for Mercedes in Berlin returns Mercedes Philippines as first result.*

- *Bug fix: Search for Bunnings warehouses in Melbourne, Australia returns only 1 (there are 50).*

- *Bug fix: Search for Bunnings warehouses in Melbourne, Australia returns only 1 (there are 50).*

- *Bug fix: Searching for "French restaurant" in Berlin finds 0 results in Berlin.*

- *Bug fix: Searching for "French" in Berlin finds only "France".*
- *Bug fix: Searching for "Japanesr" in Berlin finds only "Japanese Embassy", but searching for "Japanese" finds also restaurants.*
- *Bug fix: Searching for "German" in Berlin only results in "Germany" (as in the country).*
- *Bug fix: Searching for "Turkish" above Berlin HERE office only finds places with "Turkish" in the name, all over Europe.*
- *Bug fix: Searching for O'Hare International airport when map centered over Chicago returns Inn and not airport.*
- *Bug fix: Route to "491 Geary St, San Francisco, CA 94102" ends up in Taylor St.*
- *Bug fix: Category search for shopping needs improvement.*
- *Bug fix: Search for Boulanger (French retail chain) doesn't return results.*
- *Bug fix: Search for Legoland returns strange result.*
- *Bug fix: Wrong position for "Berlin Hauptbahnhof" (Berlin Main Station).*
- *Known Issues*

In the Place Details returned for some Indian and Arabic languages, some Latin text may occur in the street names.

Content v34

- POI Content Updates:
 - *HERE Core (Q4 2014)*
Includes Core POIs such as global Airports, Hospitals, Banks, Grocery Stores, etc.
 - *HERE Base Supplemental Listings (Q4 2014)*
Includes POIs mapped to Core POI categories obtained from third party/local specialty sources.
 - *HERE Extended Listings - Australia (Q4 2014)*
Comprehensive set of POIs for this geography.
 - *HERE RDF Landmarks (Q4 2014)*
Includes global non-POIs such as Boston Common.
 - *HERE Venues*
Includes global venues (such as airports, malls) and POIs contained within the venues.
 - *HERE Public Transit (2015-01-27)*
Includes global Public Transit locations.

- *Lonely Planet*
Includes POI descriptions for restaurant hotel and point of interests around the world.
- Address Content Updates:
 - *HERE Maps 56 and 57*
Maps 57 for U.S. and Maps 56 for rest of world.

1.0.11140 (2015-02-20)

Changes for HERE public customers

API Features

- In the `places` category system, `religious-place` is now within `facilities` instead of `sights-museums`, and explore requests for `sights-museums` will no longer return religious places.

1.0.11076 (2015-02-05)

Changes for HERE public customers

There are no notes for this release

1.0.11019 (2015-01-23)

Changes for HERE public customers

There are no notes for this release

1.0.10948 (2015-01-20)

Changes for HERE public customers

API Features

- *Updated references to HERE API products in the documentation.*
- *Fix wrong Indonesian address vicinity.*
- *Fixed broken search context link.*

1.0.10882 (2015-01-13)

Changes for HERE public customers

API Features

- *Adding more Search Examples to Tutorial*

We added more examples to the tutorial on the landing page that are demonstrating the capabilities of the search engine rather than just explaining the protocol.

1.0.10790 (2014-12-12)

Changes for HERE public customers

Search Features v33

- *Enhanced Chain Support for Automotive Dealers*

End-users can now search for automotive dealers by brand and receive a set of relevant POIs sorted by distance.

- *Enhanced Category Search for German*

The Search endpoint provides better recognition for category-like German queries.

- *Search Results Provide Better Disambiguation Information*

Search results now provide additional information about administrative regions to help end-users select the most appropriate location.

- *Enhanced Recognition of Closed POIs*

Enhancements have been made to better recognise POIs that are closed in the real world. Note: some customers may notice a reduction in POIs as a result.

- *Bug Fix - "Sights and Museums"*

"Religious places" are no longer grouped into the "Sights and Museums" category

Content v33

- POI Content Updates:
 - HERE Core (2014Q3)
 - HERE Supplemental Listings (2014Q2)
 - HERE Extended Listings - Australia (2014Q3)
 - HERE RDF Landmarks (2014Q3)
 - HERE Venues
- Address Content Updates:
 - D56 2014Q3

1.0.10751 (2014-12-06)

Changes for HERE public customers

API Features

- *Improved German translation for "Underwater Feature" category*
- *Https-Support for Curl Statement*

Now the curl statement in the playground uses the same protocol as the browser.

1.0.10653 (2014-11-25)

Changes for HERE public customers

There are no notes for this release

1.0.10612 (2014-11-18)

Changes for HERE public customers

API Features

- *External media links are now HTTPS when the Places API is accessed over HTTPS*
- *Remove support of query parameter "result_types".*

The parameter result_types is replaced with two new following query parameters:

- "refinements" for discover/search endpoints (Experimental)

If this flag is set to "true", search result set will contain refined searches. A refined search helps the search engine to deal with ambiguity in user queries.

This allows application to suggest refinements to the user's search. e.g. https://places.demo.api.here.com/places/v1/discover/search?at=52.5310%2C13.3848&q=Paris+Bar&refinements=true&app_id=510b796bf1244db4820d3c665c79225e&app_code=VAx2oO%252Bb%252FUvI47FqnmYoGA%253D%253D

- "drilldown" for discover/explore, discover/around and discover/here endpoints

If this flag is set to "true", result set will contain links to a further discover query based on the current query. For example result set may contain discover query links that restrict result set to a certain category (category drill down). To request a further drill down or in this case example, to expose subcategory filters on chosen discover query, application has to append the "drilldown=true" parameter to the chosen discovery query link. e.g. https://places.demo.api.here.com/places/v1/discover/explore?at=52.5310%2C13.3848&cat=eat-drink&drilldown=true&app_id=510b796bf1244db4820d3c665c79225e&app_code=VAx2oO%252Bb%252FUvI47FqnmYoGA%253D%253D

1.0.10509 (2014-11-11)

Changes for HERE public customers

API Features

- *Expose Location Access Point (navigational street position) in Search Response*

Previous versions provided the display position only for each location returned in a result set. Additional access points for navigation are provided, when available, in the places detail response.

Search Features v32

- *Enhanced Chain Search Support*

Chain Search is a sub-system that identifies a query term as a chain of stores and returns a result set of the stores ranked by distance from the search location. Stores beyond 200 km are not returned. When Chain Search is invoked, only stores belonging to the chain are returned and other locations with similar names will not be returned. In this version the number of terms invoking a Chain Search behaviour has been expanded.

- *Enhanced Category Search for English*

The Search endpoint provides better recognition for category-like English queries. This will improve the search experience by providing more comprehensive result sets.

- *Island Search enhancements*

In previous versions, many islands were not searchable. This has been amended with 400 of the world's notable islands now searchable.

Content v32

- *POI Content Updates:*

- Third Party Supplier Content - Global

1.0.10419 (2014-10-28)

Changes for HERE public customers

API Features

- *Added permanent supported place categories*

- petrol-station
- coffee-tea
- snacks-fast-food
- restaurant

- atm-bank-exchange
- airport
- toilet-rest-area
- hospital-health-care-facility

For more details of permanent supported categories, see <http://places.api.here.com/places/static/doc/public/#topics/categories.html>

- *Added "Show all" checkbox in playground for collapsing/uncollapsing JSON response.*

1.0.10354 (2014-10-21)

Changes for HERE public customers

API Features

- *Improved Places API Playground response rendering performance.*
- *Cities with the same name in search results now can better be distinguished by their vicinity.*

1.0.10294 (2014-10-14)

Changes for HERE public customers

API Features

- *Expose location access point (navigational street position) of POIs.*

1.0.10208 (2014-10-02)

Changes for HERE public customers

API Features

- *Lookup entry point documentation is no longer marked as beta version.*
- *A bug has been fixed where CORS preflight requests were not working properly when the client was setting the Do-Not-Track header.*

1.0.10133 (2014-09-23)

Changes for HERE public customers

There are no notes for this release

1.0.10073 (2014-09-17)

Changes for HERE public customers

API Features

- *Places API rejects unknown show_refs query parameter values with HTTP status code 400 (Bad Request).*

Supported show_refs values can be found in <http://places.demo.api.here.com/places/static/doc/public/#topics/representation-modifiers.html>

1.0.10068 (2014-09-17)

Changes for HERE public customers

API Features

- *Places API rejects unknown show_refs query parameter values with HTTP status code 400 (Bad Request). Supported show_refs values can be found in <http://places.demo.api.here.com/places/static/doc/public/#topics/representation-modifiers.html>*

1.0.9997 (2014-09-11)

Changes for HERE public customers

API Features

- Resolved issue in Places API playground: "in" input field value was not updated when circle on map was moved/resized.
- Resolved issue: `next` media link was shown when size parameter is same as number of media items.

Content v31.1

- Address Content Updates:
 - D55 2014Q2

1.0.9888 (2014-09-01)

Changes for HERE public customers

API Features

- PDF developer guide documentation is now available through Places API Playground.
- Release notes are now available through Places API Playground.

1.0.9823 (2014-08-21)

Changes for HERE public customers

There are no notes for this release

1.0.9772 (2014-08-13)

Changes for HERE public customers

API Features

- *Protection against URL Templating*

Places API follows a hypermedia approach that allows HERE to collect valuable relevancy and popularity information from search and place interactions. A known weakness in the legacy implementation that allowed a customer to bypass the hypermedia approach has now been fixed. This bypass-method is known as URL Templating, and new customers attempting to use this method will be blocked from using this approach.

- *Public Transport Extension*

Currently Places API provides search for Public Transport stops. This includes the facility to see what PT stops are near a particular POI. This extension builds on these features by increasing the attribute information provided by the Public Transit API. Specifically this allows the Places API to expose structured representations such as public transport lines.

- *Localisation Extension*

Places API now provides additional languages available for labels, categories and ready-to-display strings. These additional languages include: Afrikaans, Armenian, Assamese, Basque, Galician, Georgian, Kyrgyz, Lingala, Mongolian, Myanmar, Oriya, Sesotho, Sinhala, Tajik, Turkmen, Uzbek (Cyrillic), Xhosa, Zulu

Search Features v31

- *Improvements in POIs matching and blending process*

Records from multiple sources are matched and blended to provide the most reliable data set to the end user. Enhancements to the machine learning algorithms have been made to improve the matching and blending process. Specifically:

- Phone number mismatches will be ignored if one of the phone numbers is toll-free.
- Names containing cuisine information will be better matched ("Pino's Italian Restaurant" vs. "Pino's Restaurant")
- Higher matching robustness against wrong categories through title-based auto-categorisation.

- *Category Search Improvement*

Category Search is now more adaptive to changes in user behaviour through more frequent automatic updates of the feedback relevance signal. This improves the relevance ranking, automatically placing the more active POIs higher in the result set.

Content v31

- POI Content Updates:
 - HERE Core (2014Q2)
 - HERE RDF Landmarks (2014Q2)
 - Third Party Supplier Content - Global
- POI Content New:
 - HERE Extended Listings Australia (2014Q2)
- Address Content Updates:
 - D56 2014Q3

1.0.9594 (2014-07-22)

Changes for HERE public customers

Search Features

- *POI Processing Improvements*

Enhancements to the machine learning algorithms have been made to improve the matching process across the various POI data sources. Specifically this will improve the quality of phone number availability, cuisine matching and categorisation.

Content

- All major suppliers have been refreshed.
