Version:	Version 1.4.10
Document	
Name:	Data Lens Release Notes
Id:	502e751-1437148839
Status:	FINAL
Date:	2015-Jul-17, 16:03 (GMT)

Overview

The scope of this document is to provide the release notes of Data Lens, with respect to a particular release version. It also includes the issues reported, open and solved within this release.

Added Functionality

Data Lens API changes include:

- No changes.

Data Lens Editor changes include:

New Features:

- Dataset Geocoding. Import a dataset, open in preview mode, select the columns you want to use to geocode and press start. Data Lens will take care about providing appropriate Latitude and Longitude for your dataset items.
- Export code related to certain visualizations tiles to JsFiddle or download it as a zip file on your computer for further editing in your preferred IDE.
- Switch between the WYSIWYG user interface and code view. See what code generated the visualizations you create with the Editor user interface. Click on the button "See Code". This is the perfect way to learn how to use the Data Lens APIs and JS Libraries.

Improvements/Enhancements:

- Documentation UX, structure and content improvements.
- Minor landing page structure improvements.
- Update to the latest version (1.3.1) of JS the libraries.
