Product

Name: Map Tile API

Version: Version 2.1.68.0

Document

Name: Map Tile API Release Notes

Id: 7725ad4-1437475817

Status: FINAL

Date: 2015-Jul-21, 10:57 (GMT)

Chapter 1

Overview

Topics:

- [Map Data Version](#)

The scope of this document is to provide the release notes of Map Tile API, with respect to a particular release version. It also includes the issues reported, open and solved within this release.

Map Data Version

This version is approved for use with the following content:

- HERE Worldwide 2015Q1
 - NavInfo China, Macau 2014Q4
- 📄 **Note:** This map is updated weekly based on this content.

Chapter 2

Major Enhancements

Topics:

- [Highlights](#)
- [API Changes](#)
- [Resolved Issues](#)

This section lists new features and interface changes.

Highlights

The following highlights summarize the most important changes, added functionality and improvements in version 2.1.68.0 of Map Tile API:

- We added a new tiletype `blinetile` that shows the same information as `basetile`, but without buildings.
- We added a new feature for `metadata` that shows the simplified building outline, this only works with `mgen=2`.
- We fixed some issues with `metadata json` names to provide a cleaner interface. Now when you get an icon it will always be in `box 1`. The text will be in `box 2`, if there is an icon, and in `box 1` if it is without an icon.

API Changes

- New tiletype `blinetile`
- Changes to the internal `json` format, only applied when `mgen=2` is used

Resolved Issues

The following issues have been resolved in this release:

Issue ID	Description
13509	We fixed some issues with bounding boxes using <code>text box</code> for the icon.
13480	We fixed some issues with text boxes using inconsistent naming for <code>json</code> .
