# Chapter 1

## Overview

---

### Topics:

- [Highlights](#)

The scope of this document is to provide the release notes for the Positioning API for a particular release version. It lists added and improved functionality as well as the issues resolved and known issues remaining in this release.

## Highlights

---

The following highlights give a short summary of the most important changes, added functionality and improvements:

- We increased the maximum number of WLAN access points in a request from 64 to 128.
- We renamed `frequency` to the more descriptive and precise `channel` in the CDMA neighbor object parameters.
- We added the new optional parameters `channel` and `pnoffset` to CDMA serving cell object.
- We added support for `Content-Encoding: gzip` in request headers.

# Chapter 2

## Changes

---

### Topics:

- [Functional and Behavioral ...](#)
- [API Changes](#)
- [Resolved Issues](#)
- [Known Issues](#)
- [Limitations and Workaround...](#)

This section documents major changes to the release that may require the updating of affected applications.

## Functional and Behavioral Changes

---

There are no functional or behavioral changes in this release.

## API Changes

---

### Added

- Support for the request header `Content-Encoding: gzip`.
- Attributes `channel` and `pnoffset` in `cdma_cell`.

### Changed

- Attribute `frequency` in `cdma_cell/nmr` was renamed to `channel`. Deprecated `frequency` attribute will be removed in coming releases.
- Maximum amount of WLAN access points in a request was increased from 64 to 128.

## Resolved Issues

---

There are no resolved issues in this release.

## Known Issues

---

There are no known unresolved issues in this release.

## Limitations and Workarounds

---

There are no limitations and workarounds in this release.
