Chapter 1

Overview

Topics:

- [Highlights](#)

This document provides a summary of important changes for this version. Apart from newly resolved issues and added or improved functionality, this document also includes information about known issues remaining in this release as well as any existing limitations and workarounds.

Highlights

The following highlights give a short summary of the most important changes, added functionality and improvements:

- Introduced *New Investigation* request/interface to allow customers to ask for a new investigation of a feedback that has been investigated before but the customer is not satisfied with the outcome.
 - Added support for the new use case *Road Condition* to allow customers to report road obstacles and other special circumstances on a road.
 - Added new options to the reasons why a feedback got rejected.
 - Added new address-specific property building name.
 - Deprecated the probe use case to be removed in the 2.8 release.
-  **Note:** We recommend to remove this function from your applications now.

Chapter 2

Changes

Topics:

- [Functional and Behavioral ...](#)
- [API Changes](#)
- [Resolved Issues](#)
- [Known Issues](#)
- [Limitations and Workaround...](#)

This section documents major changes to the release that may require the updating of affected applications.

📄 **Note:** For changes made in previous releases, see the related documents at <http://developer.here.com>.

Functional and Behavioral Changes

There are no functional or behavioral changes in this release.

API Changes

Added

- Feedback status REOPENED
- Support for (physical) road condition feedback use case
 - 📖 **Note:** For more information, see <https://developer.here.com/rest-apis/documentation/map-feedback/topics/resource-type-errors.html>.
- New error code 980 for Road Condition use case
- Address-specific property building name
- app_id and app_code parameters to allow for authentication in the request URL instead of the headers

Changed

- Added new options to the reasons why a feedback got rejected.

Removed

- None
- 📖 **Note:** The probe-specific properties are deprecated for removal in this release and will be removed in the next release. We recommend to remove this function from your applications now.

Resolved Issues

The following table summarizes major issues resolved in Map Feedback API.

Table 1: Resolved Issues

#	Issue
1	Documentation issues for created_TS and lastUpdate_TS timestamp units resolved.

Known Issues

There are no known unresolved issues in this release.

Limitations and Workarounds

There are no limitations and workarounds in this release.
