Chapter 1

Overview

Topics:

- [Map Data Version](#)
- [Highlights](#)

This document provides a summary of important changes for this version. Apart from newly resolved issues and added or improved functionality, this document also includes information about known issues remaining in this release as well as any existing limitations and workarounds.

Map Data Version

This version of Routing API supports the map data version 8.30.91.156. This map reflects data that is current as of 2018Q4 and contains the latest high priority updates, with the following exceptions:

- China map data is 2015Q4
- Iran map data is 2015Q1

Highlights

The following highlights give a short summary of the most important changes, added functionality and improvements:

- Added support for license plate based restrictions in Indonesia and Philippines.
- Added options to avoid zones of indicated types.
- Fixed issue of single and tandem axle (US specific) weight restrictions being evaluated as gross weight restrictions.
- Increased in US the range of u-turn types avoided when requested to avoid difficult turns.
- Fixed issue of Matrix Routing computing incorrect distance in certain cases.
- Fixed issue of values in matrix entry summaries diverging from those generated from route ID.

Chapter 2

Changes

Topics:

- [Functional and Behavioral ...](#)
- [API Changes](#)
- [Resolved Issues](#)
- [Known Issues](#)
- [Limitations and Workaround...](#)

This section documents major changes to the release that may require the updating of affected applications.

Note: For changes made in previous releases, see the related documents at <http://developer.here.com>.

Functional and Behavioral Changes

The following table contains descriptions of added or changed functionality and changes in product behavior.

Table 1: Functional and Behavioral Changes

#	Description
1	We added support for license plate based restrictions in Indonesia and Philippines.
2	We added options to avoid zones of indicated types.
3	We fixed issue of single and tandem axle (US specific) weight restrictions being evaluated as gross weight restrictions. Single and tandem axle weight restrictions are now supported as weight-per-axle restrictions. Note that complex evaluation is still unsupported.
4	We increased in US the range of u-turn types avoided when requested to avoid difficult turns.
5	We fixed issue of Matrix Routing computing incorrect distance in certain cases.
6	We fixed issue of values in matrix entry summaries diverging from those generated from route ID.

API Changes

Added

- Parameter `allowedZones` added to `calculateroute` resource.
- Parameter `excludeZoneTypes` added to `calculateroute` resource.
- Parameter `licensePlate` added to `calculateroute` resource.

Changed

- None.

Removed

- None.

For more information, see <https://developer.here.com/rest-apis/documentation/routing/topics/api-reference.html>.

Resolved Issues

The following table summarizes major issues resolved in Routing API.

Table 2: Resolved Issues

#	Issue
1	Issue of single and tandem axle (US specific) weight restrictions being evaluated as gross weight restrictions.
2	Issue of Matrix Routing computing incorrect distance in certain cases.
3	Issue of values in matrix entry summaries diverging from those generated from route ID.
4	General bug fixes and improvements

Known Issues

There are no known unresolved issues in this release.

Limitations and Workarounds

There are no limitations and workarounds in this release.
