---

## Overview

---

This document provides a summary of important changes for this release. Apart from newly resolved issues and added or improved functionality, this document also includes information about known issues remaining in this release as well as any existing limitations and workarounds.

## Map Data Version

---

Map data is currently updated in a bi-weekly cadence.

## Highlights and New Features

---

The following highlights give a short summary of the most important changes, added functionality and improvements:

- Toll cost and environmental zone access can be fuel type dependent, so `calculateroute.json` got a parameter `&fuelType=petrol/diesel/lng/lpg/cng/ethanol/propane/hydrogen/electric`
- Basic support for bicycle routing (`mode=bicycle` instead of car or pedestrian).
- `calculateroute` response contains travel time and length per route leg.
- Routing can return maneuver instructions either in text or html format (parameter `&instructionFormat=text/html`).
- Routing can return additional maneuver information (parameter `&maneuverAttributes=direction,action`)

## Changes

---

This section documents major changes to the release that may require the updating of affected applications.

## Functional and Behavioral Changes

---

The following table contains descriptions of added or changed functionality and changes in product behavior.

TICKET NUMBER	DESCRIPTION
---------------	-------------

---

## API Changes

---

The sections below list APIs that were added, changed, or removed.

### Added

---

- No additions

### Changed

---

- To use the preferred routes for B-Double trucks (in Australia) no separate parameter is required anymore. Simply specify vehicle type "bdouble" in the routing "mode" parameter, instead of "truck".

### Removed

---

- No removals

## Known Issues

---

There are no known unresolved issues in this release.

The following table lists issues known to be present in the current release.

ISSUE ID	DESCRIPTION
-	No known issues

---

## Resolved Issues

---

There are no resolved issues in this release.

The following table summarizes issues resolved in the current release.

ISSUE ID	DESCRIPTION
-	No resolved issues

---

## Limitations and Workarounds

---

This section lists known limitations and, if available, related workarounds in the current release.

TICKET NUMBER	LIMITATION	WORKAROUND
-	No Limitations	-
