Maps for Life

Directions

Feature Highlights

Moving commercial goods and services from A to B takes enterprise-grade data and services that reflect real world realities. **Directions** services are built on enterprise-grade maps to enable sophisticated multi-modal routes for cars, trucks, public transit and pedestrian travel. Rich commercial vehicle data enables safe, legal routes based on truck size, weight, hazardous freight restrictions and more.

Route options

- Fastest/shortest/scenic
- Avoid highways, toll roads, unpaved bridges, tunnels and more
- Optimize route: eco, cost, time, distance and more
- Alternate routes
- Stop-overs and via points
- Vehicle speed profiles

Traffic-enabled routing

- Traffic-aware routes based on real-time and/or historical traffic data
- Time-aware routes based on time of day, time of the year (seasonal roads, lane configuration changes, etc.)
- Incident-aware routes based on traffic accidents, construction, etc.

Toll road distance calculation

- For cars or trucks
- Per country/region
- Link info
- Speed limit, traffic speed, base speed and more

Specialized commercial routing

- Truck routing with support for all physical and legal restrictions including hazardous goods
- Matrix routing with support for all routing options (e.g. traffic, truck, pedestrian, shortest, fastest, etc.)
- Isoline routing with support for all routing options (e.g. traffic, pedestrian, shortest, fastest, etc.)

Route directions

- Instructions in over 100 languages
- Distance and driving time to destination
- Up to 50 waypoints per route
- Dynamic ETA based on multiple static and/or dynamic data sources

Transit routing

- Frequency-based transit schedules
- Timetables in more than 400 cities worldwide

Only **HERE Platform** delivers powerful, flexible and global location cloud services built on enterprise-grade map data.
